

LENTO4.4M

4 x ALTI4M/W + COM108

Product information:

The combination of the ALTI4M loudspeakers' stunning design, high-quality components and excellent off-axis performance, together with the die-cast mounting bracket for wall and ceiling purposes enables the LENTO4.4M set to be mounted in numerous ways and different configurations, providing an endless variety of versatile placement options in terms of mounting. Guaranteeing clear speech intelligence and a warm and detailed sound reproduction with elegant aesthetics.

Powered by a COM108 amplifier, great flexibility for connecting sources and microphones is offered. This system, using 4 ALTI4M loudspeakers, can cover areas of around 100m² with warm and detailed sound.
