Product description

The ViewSonic® CDE7530 is a 4K display for wireless presentations and multimedia playback. Multiple users engage in convenient conferencing and share content with each other, whether on-site or online. This is made possible by the intuitive screen sharing software*, ViewBoard® Cast and Display, as well as the matching ViewBoard® Cast USB-C/HDMI dongles. Thus, the CDE30 is much more than a conventional commercial display, namely a dynamic content hub that sustainably promotes collaboration in (international) teams. The reliable display is equipped with a powerful quad-core processor and internal memory, enabling playback of multimedia content from internal memory or a USB stick. The ViewSonic® CDE30 supports various remote configuration and content management systems, making it suitable for info zones and signage.
