

## **i3PROJECTOR 3303Wi** **INTERACTIVE PROJECTOR**

The 3300-lumen i3PROJECTOR combines the roles of ultra-short-throw projectors and interactive whiteboards in one multi-purpose, integrated system. Simple and straightforward, the i3PROJECTOR 3303Wi is user-friendly and has advanced features for flexible presenting. Connecting the 3303Wi to a computer, users can operate computer software with the two interactive pens in the same way as a mouse, and can also digitally annotate the projection without the need for an additional interactive whiteboard. The dual pen operation enables collaborative learning and helps to boost meeting creativity. As it is mounted to the wall above the projection surface, i3PROJECTOR completely eliminates shadows.
