

## Universal Soundbar Speaker Mount **SKU: SASB1-B1**

---

The SANUS SASB1 soundbar mount seamlessly integrates your soundbar with your mounted TV. Featuring broad compatibility, the soundbar mount attaches to the back or bottom of soundbars and works with most soundbars up to 20 lbs.

Post-install height adjustment creates an ideal fit between the soundbar and mounted TV. The included depth-adjustability allows the soundbar to be positioned flush with the bottom of the TV for a clean look and helps eliminate audio interference from upward-firing speakers. Compatible with SANUS TV mounts and other UL listed mounts, the SANUS soundbar mount works with a large range of TV sizes and features broad VESA compatibility. When used with a full-motion TV mount, the soundbar mount allows your speaker to move with the TV for an optimal listening experience.

Installation is a brief, 15-minute process that requires only a screwdriver, and all necessary hardware is included in the box.
